TPU 注塑鞋底打开内销的“开门砖”

This image displays four distinct shoe sole designs, likely representing different types of footwear or materials. The designs are arranged in a 2x2 grid. The top-left sole features a multi-lobed, segmented pattern with a dark, possibly leather-like texture. The top-right sole has a geometric, angular pattern with a dark, possibly leather-like texture. The bottom-left sole is a solid, bright orange color with a textured, possibly rubber-like surface. The bottom-right sole is white with a perforated, mesh-like pattern, suggesting a lightweight or breathable design.
